Kamran Nazir
10 Pearls Software House
Block 3 Shahrah-e-Faisal
Karachi, Sindh 75850

Dear Mr. Nazir,

I am excited to submit the resume here at 10 Pearls for the position of Full Stack Developer. I read the opening for the position on Linked In and I am optimistic that my particular experience, education and expertise is relevant for this position.

As mentioned in my resume, I have completed my bachelors degree in Software Engineering at FAST NUCES KARACHI in June 2022. This degree program not only allowed me to gain development education but also the management of development teams and organizations which would be a major requirement for this position. Moreover, in my university days, I took part in multiple coding competition and won prizes in speed programming and management competitions. Apart from my academic education, I also have done certifications for back-end and full stack development from Udemy and Coursera. Furthermore, I have worked on numerous projects one of which is Library Management web application which I built on MERN stack framework and sold it to my university due to its responsiveness and good interface.

My interest is specifically in web development and this position would allow me to use my expertise efficiently. It would also help me to groom in a professional and healthy working environment that this company offers to its employees. For these reasons, I am particularly excited to apply for this position in hopes that I may have the opportunity to contribute to such a great company.

I would appreciate the opportunity and bring value to the company. I am also looking forward to having an interview in which I may explain my passion and diverse work projects I have worked on. You can contact me at (+92 3362835372). I look forward to hearing from you.

Sincerely,

EhteshamZafar
