

Cloud Computing

Ability to understand 5 pillars of the Well-Architected Framework - Operational Excellence, Cost Optimization, Reliability, Performance Efficiency, and Security

Ability to use Well-Architected Lenses (like financial service industry) to map business application on cloud-based solution

Contents

Week 1: Introduction To Cloud Computing

Week 1: Cloud Computing Architecture

Week 2: Introduction to Microsoft Azure

Week 2: Introduction to Amazon Web Services and AWS Solution Architect

Week 3: AWS identity and Access Management (IAM)

Week 3: AWS Organizations

Week 4: Elastic Cloud Compute (EC2) Part 1

Week 4: Elastic Cloud Compute (EC2) Part 2

Week 5: Elastic Load Balancing and Auto Scaling Part 1

Week 5: Elastic Load Balancing and Auto Scaling Part 2

Week 6: Block and File Storage 4

Week 6: Amazon Virtual Private Cloud (VPC) Part 1

Week 7: Amazon Virtual Private Cloud (VPC) Part 2

Week 7: Amazon Simple Storage Service (S3) Part 1

Week 8: Amazon Simple Storage Service (S3) Part 2

Week 8: DNS, Caching and Performance Optimization

Week 9: Introduction to Docker, Containers and ECS

Week 10: Serverless Applications

Week 11: Database and Analytics

Week 12: Deployment and Management

Week 13: Monitoring, Logging, and Auditing

Week 14: Security in the Cloud

Week 15: Introduction to Infrastructure as code

Week 16: Question / Answers, Full Practice Exams
